

C-CureEdge™

***Give your conveyor belting the Edge...
C-CureEdge... only with Flat-Flex®!***

C-CureEdge belting from Wire Belt with its patented closed-loop ends gives the processor advantages never before available with this type of conveyor belt.

C-CureEdge Advantages

- Eliminates "zipper effect" tangling when un-rolling or re-rolling
- Patented design improves flexibility and reduces individual strand stress on the outside edge of the belt
- No tangling during shipping, storage, or installation
- Diminishes opportunity for conveyor damage caused by end loop irregularities found in competitive belts
- Minimizes risk of accidents from sharp or burred open ends
- Eliminates possibility of snags and tangles when used in a "hold-down" belt application
- Improves safety, and flexibility when installed on product placement, shuttle, or slider-bed, conveyors
- Lessens opportunity for conveyor to conveyor catching and tangling during transfers
- Allows Flat-Flex® belt to run side-by-side without catching or snagging

***The New Edge
in Conveyor Belting!***
