

## Experts in product movement

Combination and hybrid conveyor systems provide unique processing solutions.

Our Flex-Turn® conveyors are available in five different models, eleven different sizes and in angles from 45° to 180°.

Spreading and converging conveyors, utilise our exclusive Ladder-Flex™ belting to achieve smooth product separation or convergence.

The innovative shuttle allows precise product placement across production lines.

Standard straight conveyors are available, fitted with Flat-Flex® or other belting to suit most applications. A wide range of optional features, and special variants, ensure the versatility to satisfy most application requirements.

**Our technology is shaped by your needs**

**All our conveyors are of hygienic stainless steel construction and made to your requirements**
